Summary

Software Engineer with practical experience in backend and full-stack web development through academic projects and a .NET internship. Skilled in C#, ASP.NET Core, RESTful API development, SQL Server, Dapper ORM, Git, and relational databases, with prior experience building scalable web applications using React, TypeScript, NestJS, and PostgreSQL. Passionate about writing clean, maintainable code, solving real-world problems, and continuously expanding expertise in modern software development.

Skills

Programming Languages

C#, Java, Python, SQL, C

.NET & Backend Development

ASP.NET Core Web API, Dapper ORM, RESTful API Development, LINQ, Authentication & Authorization (JWT), CRUD Application Development

Projects

Expense Tracking System, *Personal Project*

06/2026 – 08/2024

- Developed a full-stack **Expense Tracking System** using **.NET 8 Web API**, **Dapper ORM**, **Microsoft SQL Server (MSSQL)**, and **SQL Server Management Studio (SSMS)**, implementing secure and efficient CRUD operations for income, expenses, and category management.
- Designed RESTful APIs with a clean layered architecture, optimized database interactions using **Dapper**, and integrated API testing with **Swagger** and **Postman** to ensure reliable backend functionality and performance.

Professional Experience

Dotnet Internship, *Percoid IT Solutions*

04/2026 – 08/2026 | Lalitpur, Nepal

- Developed and Learned **CRUD-based RESTful APIs** using **ASP.NET Core (.NET 8)** and **C#**, following a layered architecture and dependency injection to build scalable and maintainable backend services.
- Learned and implemented database integration using **Dapper ORM** and **Microsoft SQL Server (MSSQL)**, including writing and executing SQL queries for efficient data access.

Education

Bachelor of Engineering in Software Engineering

11/2022 – 12/2026 | Lalitpur, Nepal

Nepal College of Information Technology

- Consistently achieved high academic performance with average **GPA of 3.80** in the semesters.
- Gained a strong foundation in programming, software development, machine learning, and database management.
- Completed multiple academic projects involving teamwork, and practical software development.
